CHANG AND ENG.

Dr. l'ancoast's Final Report on the Oriental Monstros ties.

Two Hearts and Two Distinet Organizations.

THE GREAT MYSTERY SOLVED.

PHILADELPHIA, Feb. 20, 1874. The last point of interest to the public in relation to the Siamese Twins is now apparently settled.
It is the question which relates to their hearts. toward the solution of which, the medical gentle men are now slowly and tediously appro ing, and which finds no place in the ometal The report in the HERALD of Thursday anticipated by just twenty-four hours the official statement of the physiwhich made its first appearance The peculiar abnormality of the livers, the union of the two in fœtai life, the strange manner in which an injection forced within the mesenteric vein of the one passed into the mesenteric vein of the other, the interior structure of the connecting link, the position of the two ponches, or sacs, evident reflection of the ritoneal membrane and the fact that there existed between the two but a common umbilical ginous attachment from the sternum of the fully and accurately described in your columns, and up to that time had not found appearance These were the sole and only facts peorporated within the official report rendered to-day, but were clothed in all the incomtechnicalities of the profession which your correspondent stated at the time he was obliged to pass by the board. The remainder report was a description of the trip to Mount Airy, which was published by you about a nade which find no place in the report-namely, the circumstance of the one who died first draining all the blood from the one who died last, along with many other minute particulars which were of the greatest interest to the public. THE HEARTS OF THE TWINS.

There is nothing remaining now to investigate ave the peculiar position of the hearts. The livers of the twain were upon opposite sides and laid in close connection. By the natural law of the same. Their apexes incline towards each been one and the same, or, of course, both would have died in the same hour. The heart of Eng is upon the right side, and the heart of Chang is upon the left; hence that or one is strangely and abnormally placed.

Find injected into the heart of one failed to And its way to the heart of the other, as was the union, were operated upon. This is the last fact which establishes the individuality of each. In lie their sympathies, passions, emotions, inclina-tions and personal habits were decidedly and sadly estranged, and this circumstance alone, without any keen anatomical scrutiny, would have shown the individuality of their heart and Two individuals brought from different extremes of the world could have passed through number of years alloted to the twins with less disagreement and condict than these two incongruous, unsympathetic children, forced constantly to bear each other's purdens and com-

has already been indirectly hinted at-namely, the time the twins passed under the knile they became common property of the country and the When the last curious scrutiny of science thall have been satisfied, and when one scans no store the columns of the daily papers to the two, in public halls and theatres. exposed to view, and as the living journeyed from place to place, so will the dead hither and thither be freighted. The strict and stringent columns indicates this, and every stage the autopsy has been carried on with The sympathetic and somewhat cultured disposition of the eldest daughter ders and revolts at this, and the voices of their children cry loudly out against it; but the individuals for the sake of gain, seem to be determined, and once again the Siamese Twins will to the world, not as living, breathing souls a strange freak of nature—but as dull and stark corpses-corpses rendered interesting only because of the sensation of a slow and weary post-

THE INDIAN TRIBES.

WASHINGTON, Feb. 20, 1874. Captain George H. Davis, of the Fourteenth infantry, reports from Sidney Barracks, Nebraska, February 13, that on the day before he had an in terview with the Sloux chiefs Pawnee Killer, Two Lances, Fire Lightning and High Bear, all of the Cut off band. Captain Davis says:—
"They came into Sidney accompanied by Mr.

Clifford, a trader, who lives in their village, and I learned from them the following:-

The same day the horses were stolen from Reddington they moved their camp from its former location, on Pole Creek, at Brownson's, Sidney, to the North Platte, and they are now camped about thirty-five miles above Julesburg and five miles below Riverside, nearly due south, and thirty miles distant from this post.

FRIENDLY TEMPER OF THE "CUT OFF BAND."

"They claim that no Indians have left their camps since their recent talk with General Dudley, and but two lodges have joined from the North. They ted by their young men, and that they have faithfully observed their promises of friendship. They came to Sidney for the purpose of learning the truth and to show the whites

came to Sidney for the purpose of learning the truth and to show the whites that they kept their word. They promised to observe carefully the orders which they have received from the military to prevent their young men from roaming about the country, it told them that the troops were now in pursuit of some Indians who had stolen stock and wounded a white man; that if they moved from their visiage and travelled about the country they would be liable to be mistaken for tad Indians and attacked by the troops.

PAWNER KILLER'S DESIRE FOR PEACE.

"Pawnee Killer asked that I would send to the Red Cloud agency and have the remainder of his band, some 140 lodges, under Little Mound, come to the South Platte. He said the Northern Sionx were fools and might make war, but the "cut off band" would not join the Minnecongous, and he wasted to get his whole band together south of the railroad, so they could Reep away from the Northern Indians, and keep out of trouble. Of course I declined to send for Little Mound. Pawnee Killer said he learned from an Indian, who recently came from the Spotted Tail Agency, that he ran across the body of an Indian recently killed near Court House Rock, and recognized him as Two Striker, a Minnecongou, but saw nothing of the remainder of the party.

"It emine the said the learned from an Indian, who recently came from the Spotted Tail Agency, that he ran across the body of an Indian recently killed near Court House Rock, and recognized him as Two Striker, a Minnecongou, but saw nothing of the remainder of the party.

"It emine the said the kerned from the spotted tail all about the war party which has been operating in this vicinity if they chose. In my opinion, the raiders are all Minnecongous, and the party does not seem to number more than they could teil all about the war party which has been operating in this vicinity if they chose. In my opinion, the raiders are all Minnecongous, and the party does not seem to number more than they could teil all about the war party which has been operati

Great Pather would designate a piece of ground where their whole band could settle down and live in peace with their families until the war was over. They would be great to see the Minnecongous whipped, and their Great Pather ought to have done so long ayo.

Decharse of the Rice Verrez indians.

A letter from Special Commissioner J. A. Tonner, to the Commissioner of Indian Affairs, dated Prescott, A. T., January 22, says of the Rice Verde Indian reservation that, from the list of over 1,900 Endians there in July tast, but 850 remain. The remainder have died or fied to the mountains, many of them preferring death by warrare to failing by disease. The Apache Yumas, who were removed from the Colorado River reservation last summer, have suffered greatly and begged to be allowed to return there. Their numbers have been reduced from 460 to 292 since going there, by sickness and desertion. The Apache Mohaves bumbered 508, now only 386; and the Tontos have been reduced from 910 to 222.

PROFOSAL TO REMOVE THE APACHES.

Commissioner Tonner recommends that the Apache Yumas and Apache Mohaves be removed to the Colorado River reservation, and the Fontos be sent to the White Mountains reservation. General Crook objects to the removal of the first named, less they should think they had gained the point soughs by going on the Colorado reservation in opposition to his orders last June. The Special Commissioner deems them sufficiently nunished and would insure their good behavior at the Colorado. He says a matter of opinion should not interiere with what is due to humanity, General Crook objects to the removal on that account. This plea did not avail the Apache Yumas last year, the enmity of the Pontos being their great objection to going on the Verde; but no conflict took place, though they minsied every ration day. Since the enlargement of the Colorado River reservation there is ample room for all these Indiana, and facilities to plant which can at once yield them a partial support and employment.

MERTING OF THE INDIAN COMMI

for all these indians, and iscilities to plant which can at once yield them a partial support and employment.

MESTING OF THE INDIAN COMMISSIONES.

The Board of Indian Commissioners have been in session at the Arlington Hotel for the past two days. All the members are in attendance except Mr. George H. Stuart, of Philadelphis. The special object of the meeting was to consider the Indian question as it relates to the proposed legislation looking to the opening of the Indian Territory and the question recently discussed in regard to a transier of the Indian Bureau to the War Department, as well as some details of Indian management submitted to the Board for their consideration. A protracted conference was held last evening and to-day with the Secretary of the Interior as 10 the general Indian question. It developed the fact that the views of the Board with reference to Indian affairs were fully in accord with those held by the Secretary, and after a free interchange of views it was apparent that the Board were unanimously of the opinion that in the management of indian affairs they have the satisfaction to claim the most Encouraging Results of THE PEACE POLIOY; that they see in the wilder tribes a steady improvement, and that a continuation of the present policy will soon result in bringing them under perfect control and submission to all reasonable requirements of the government. The cordial relations existing between the Board and the Secretary of the Interior, and the confidence in his interest in the present policy, and his success in managing affairs in the past, would lead them to degrecate any change transferring the management of Indian affairs to any other department of the government. The inheral appropriations made by Congress for the presection of the present indian policy met with the sproval of the present indian policy met with the approval of the present indian policy met with the sproval of the present indian policy and the dead from all other considerations it is cheaper to feed indians than to

THE STREET CLEANING INVESTI-GATION.

Inspector Thorne on the Stand-Nothing

of Importance Developed as Yet. From eight until near eleven o'clock last evening the Committee on Cities of the Assembly sat comfortably in parlor G of the Fifth Avenue Hotel to hear testimony concerning the way street clean-There was quite a large attendance, including Commissioners Charlick, Duryea, Gardner and Russell, missioners Charlick, Duryea, Gardner and Russell, who very naturally seemed to manifest considerable interest in the proceedings. The counsel for the Committee, ex-Attorney General Barlow examined the only witness who was examined, inspector Thorne, and succeeded in finding out from him very little of that peculiar arcana of the public servant commonly known as "swinding." The fact is that the entire examination, though of hours' duration, consisted simply in drawing out of Mr. Thorne the modus operands of the street cleaning in this city. The inspector seemed to have thoroughly prepared himself and told at length of the way the men were put to work, now they were paid and what checks were adopted by the Police Commissioners to guard against fraud. He explained why he got pay for filing in some people's iots and why not others, and referred to the Police Commissioners for information as to what disposition had been made of the moneys obtained. In reference to the dumping was done thus and on Vincent King's lots, which adjoined Charlick's, simply because they were "handy," and the dumping was done without the Street Cleaning Commission getting any pay for the stuff used in filling up the lots. So soon, however, he said, as Solomon Mehrbach had offered a certain price per cord for the "refuse" taken up by the oarts he (Thorne) quit Charlick's lots and gave all he could to Mehrbach what the Jersey people did not takens of old. He also explained, at the close of his featumony, quit Charlick's lots and gave all he could to Mehrbach what the Jersey people did not taketas of old, he also explained, at the close of his ratimony, at the request of Mr. Charlick that because the Board of Health threatened to stop him from dumping at the loot of Ninety-sixth street he had gone (some six weeks' ago) and obtained from them a resolution (unanimous) giving him the privilege to dump on Charlick's lots again, they being near and suitable for the purpose. The Board of Health had not as yet interfered with him, so he had not as yet again begun to dump on Charlick's lots. Still, he had the authority of the Board of Police to go so even now. He stated that when he asked the Police Board to give him authority to dump on Charlick's lots again Mr. Charlick protested, remarking that he had been accused of making money heretolore by allowing his lots to be filled in by the Street Cleaning people, and he did not care to be abused for it any longer. When the resolution was passed Mr. Charlick refused to vote. Commissioner Russell at once arose alter Mr. Thorne had given in his testimony as to the Board's unanimity in passing the resolution, and asked that the exact date of its passage as to the Board's unanimity in passing the resolu-tion, and asked that the exact date of its passage should be stated. This, Mr. Thorne said, the minshould be stated. This, Mr. Thorne said, the min-utes would show.

To-day Mr. Charlick will be examined at eleven o'clock, and papers which the committee have re-quested him to furuish them will be submitted.
